

Demonstrations in Workshop on Coding Technologies for Immersive Audio/Visual Experiences

Integral 3D TV

Basic configuration

- | | |
|----------|---|
| Features | Real-time capture and display of moving 3D images |
| | Real objects (not computer graphics) are captured and displayed |
| | Full-parallax images |
| Problem | Integral 3D system requires huge number of pixels |

Elemental image

Sampling of center pixel
in each elemental image

Center view

Sampling of left pixel in
each elemental image

Volumetric Technique in a nutshell

- Keyword= patch atlas
- Obtained through non normative
**Scene
decomposition**
- A switch in the demo enables the patch atlas visualisation

+ same
For Depth
